CLIMATE TECHNOLOGIES

Exceptional wholesale services from the UK's only Specialist Daikin Supplier

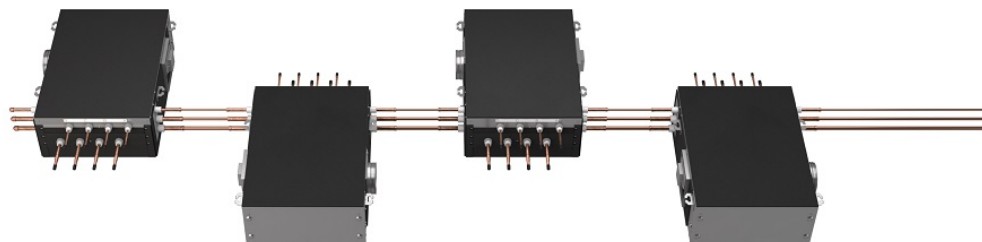

Bringing you up to speed with the very latest Daikin technology news, along with a full and comprehensive choice of Daikin equipment, spare parts, accessories, and a full range of value-led support services that are designed to make life better for air conditioning installers.

Let's get started!

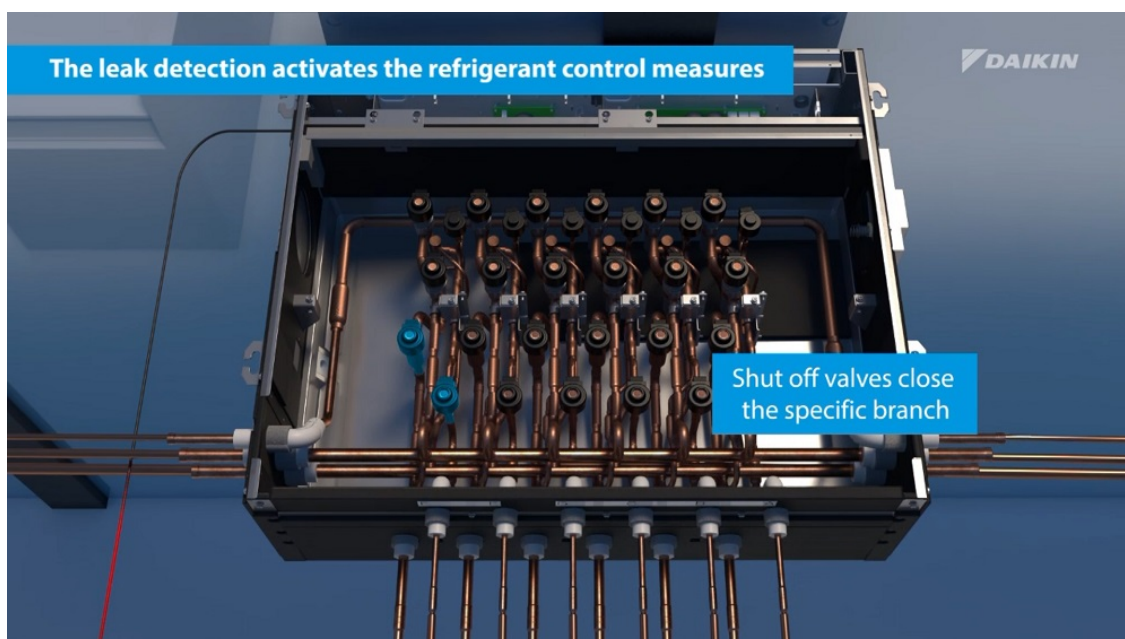

Epic news for air conditioning installers! New superhero technology with 3-Pipe Heat Recovery and Automatic Leak Detection!

The new Superhero VRV 5 Heat Recovery technology from Daikin has wowed the industry with its remarkable sustainable climate control benefits and a raft of new features.

Topping the list of innovative features is a new 3-pipe heat recovery BSSV box which has been specifically developed for lower GWP R32. This feature alone reduces pipework, labour times, and material costs – a big thumbs up from installers!

Automatic, real-time leak detection and containment

Automatic, real-time refrigerant leak detection and containment controls are another outstanding feature of the new VRV 5 thanks to built-in Shîrudo Technology which is designed to ensure that any potential refrigerant leak is quickly detected and isolated – greatly reducing direct emissions impact.

A leak is detected by a built-in sensor which issues an alarm to the operator via the Madoka remote control and the respective line is automatically shut off by valves in the BSSV box.

PLUS! Easy servicing via a new slide-down panel
