

Comfora - Improved connectivity with Multi Split outdoor unit

The Comfort range class 20-35 is now compatible with the 4 and 5-port Multi. It has also been upgraded to become ready for the DCS residential service; a separate briefing will be issued on this upgrade shortly.

Class 50-71 remains unaffected by this change, except that the outdoor units will undergo a software and parts update. The outdoor unit reference will change from RXP50-71N to RXP50-71N9 in the middle part of 2024.

DCS Residential Class 20-35 Only

The Comfora in pair (FTXP-N9 / RXP-N9) and multi applications (MXM-A9) allows contractors to retrieve the serial number for the outdoor and indoor unit remotely, to perform remote diagnostics and change field settings. Further information on DCS Residential will be shared in a separate briefing in the next couple of months.

Pairs:

For existing orders and new orders using the old material reference, we will endeavour to supply the old models. If the old models cannot be supplied, a new quote needs to be raised.

For new orders with new material references, the new Comfora will be supplied.

Multis:

The new and old outdoor and indoor units are backwards compatible, so new and existing orders will be processed accordingly.

Pricing & Availability

The prices for the new Comfora (FTXP-N9 / RXP-N9) are the same as the current Comfora (FTXP-N / RXP-N).

The new Comfora 20/25 and 35 are due from February 2024. The Comfora outdoor units 50/60 and 71 are due in August 2024.
