

NEW

Easyzone Medium Plenums

Daikin would like to announce the release of a new range of Medium sized Easyzone Plenums.

Description

Originally there were two ranges of plenums available for the Easyzone system.

1. A slim plenum designed for use with the FDXM & FXDQ range of slim ducted units.
2. A standard plenum designed for use with the FBA & FXSQ range of medium static ducted units.

The new range of medium plenums are designed for use with the FBA & FXSQ range of medium static ducted units.

By removing the fresh air integration (knock out holes and duct connections) it has been possible to reduce the overall height of the plenum from 300mm (standard plenum) to 250mm (medium plenum)..

Pricing & Availability

The medium plenums are priced identically to their equivalently sized Standard plenum.

The medium plenums are now available to order, ex-stock.

Install and Operation Manuals

The plenums are supplied with the relevant Installation and Operation manual.

They should be read in conjunction with the Easyzone controller manuals for a complete overview of the system operation.
